Her Story in History

Dear teacher or parent, I have attached a list of 50 women who have changed the world for you to use as a springboard with this project. These names were taken from a book that I use in my personal classroom and I do not claim any rights to this book. You are free to use these names, add some or delete any that you are not comfortable with using. As I mentioned earlier, this is just a list to get you started. It can be as simple as choosing a name from the list and getting to work.

Even though this is a research assignment it is short enough and can be done in chunks. What does that mean, those dendrites will be growing!!

I always find that when kids do research on people, they take a vested interest in their lives and end up having more questions. Guess that that does? Leads to more research. Oh, yeah!
