Cut out designs.

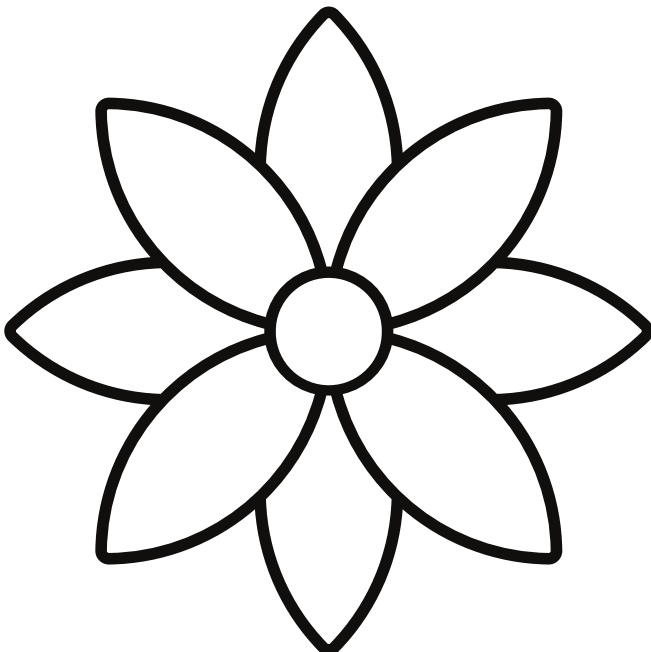

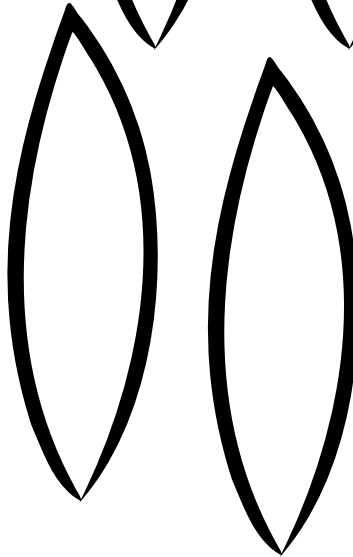

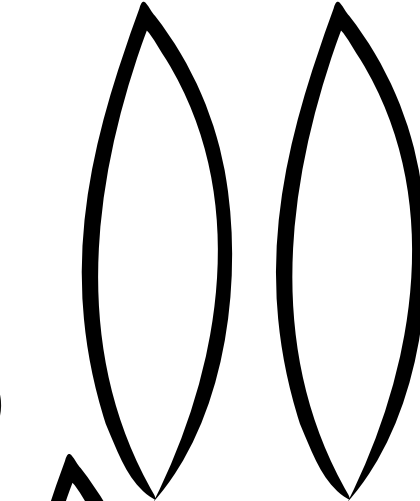

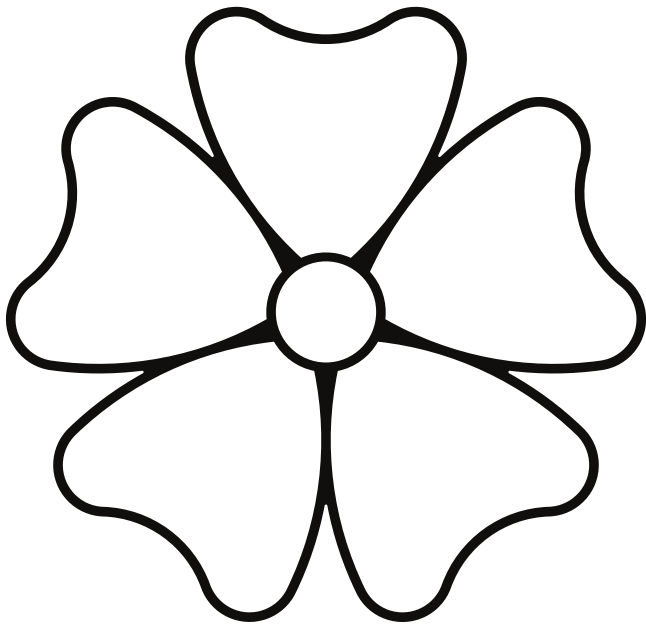

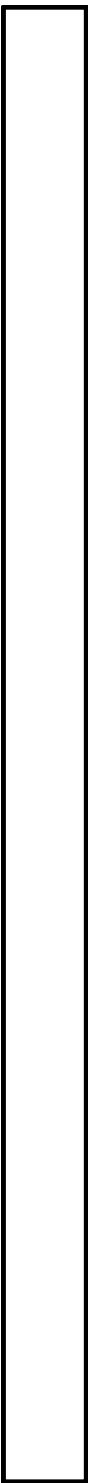

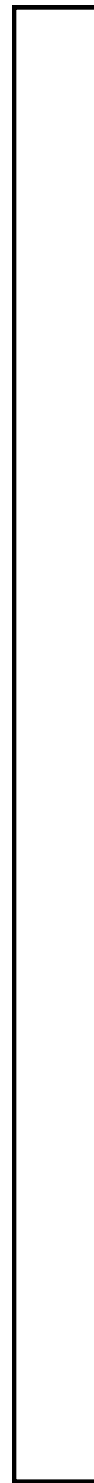

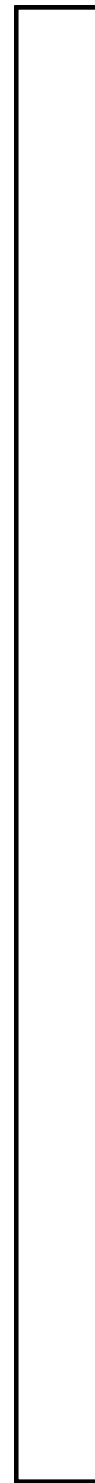

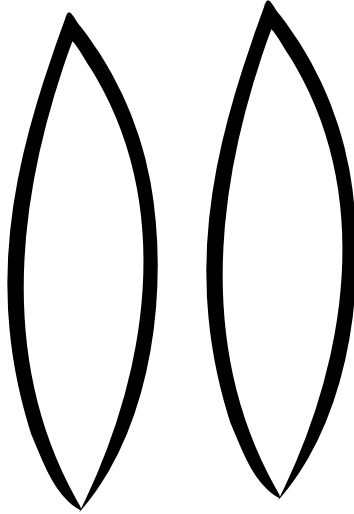

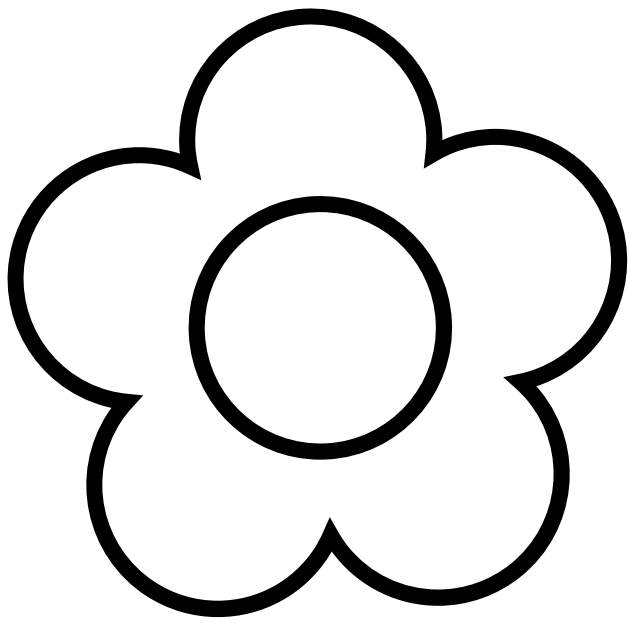

Gather your flower petals from the template. Fold six of the flower petals in half and leave three unfolded.

Add glue on the sides of one of your unfolded flower petals and glue two folded petals on the flower with the folds facing towards each other. Repeat this step to make two more tulip flowers.

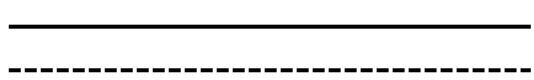

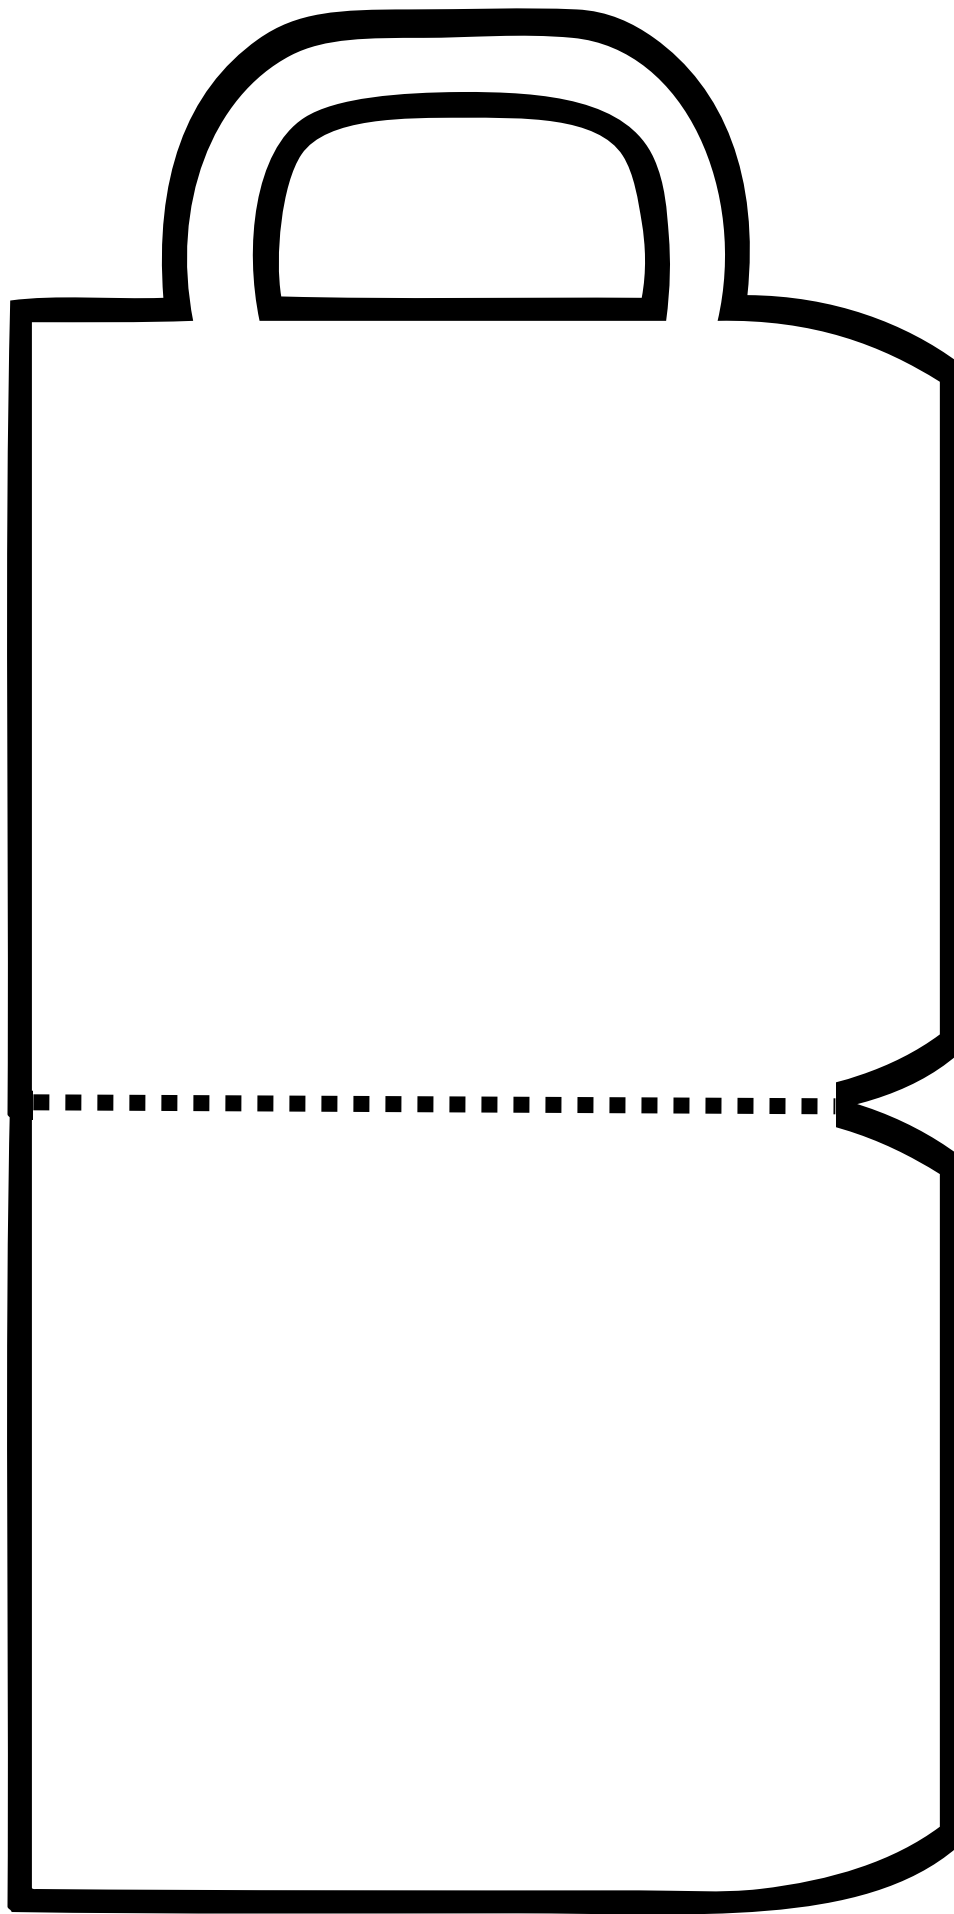

Add glue at the top of the stem.

Open up your flower pot. Add glue to the back of the stem and glue them at the top of the flower pot so the stems are down inside the flower pot.

Add glue to each side of the flower pot and stick them together.

Cut out designs. Stick together the leaves, stems and flowers using glue.
